Food Ordering Site
– PHP, JS, Bootstrap, HTML, CSS, MySQL

Built a fully functional online food ordering platform with diverse menu options, integrating a secure payment gateway, and offering a smooth user experience.

Link: `https://github.com/Aayush0430/FoodOrderingSite`

Online Liquor Store
– PHP, JS, AJAX, Bootstrap, HTML, CSS, MySQL

A comprehensive online store offering a variety of liquor categories with a modern web interface.

Link: `https://github.com/Aayush0430/OnlineLiquorStore`

Restaurant Management System
– Java, MySQL

A console-based food ordering system developed in Java, featuring a menu display for user order placement, payment, and admin panel.

Link: `https://github.com/Aayush0430/Java-Food-Order`

React Calculator
– React

A calculator application built using React to perform basic arithmetic operations with a user-friendly interface.
